Mr. Gary Baughman
Hazardous Waste Facilities Unit Leader
Colorado Department of Health
4210 East 11th Avenue
Denver, Colorado 80220

Gentlemen:

Enclosed please find five copies each of the revised sections of the Final OU5 Phase I RFI/RI Work Plan for review and comment. If additional copies are needed, DOE will provide them upon approval of the revisions.

The revised sections include: Table of Contents, Executive Summary, Preliminary Site Characterization (Section 2), Phase I Field Sampling Plan (Section 7), and portions of Sections 1, 3, 4, 5, 6, 8, 9, 10, 11, and 12. Sections which have been completely revised can be replaced in the original OU5 Phase I RFI/RI Work Plan by simply removing the original Section and replacing it with the revision. Partial sections must be updated by replacing only the page provided. Also included, is a new cover and cover sheet to reflect the revision date.

As discussed with EPA and CDH on January 3, 1992, certain tasks will be more fully described in technical memoranda (TM's). Although five of the TM's were discussed in the January 3rd meeting, a sixth is being proposed to address the number of boreholes needed in the Ash Pits based on preliminary investigations (aerial photographs, radiation survey, and geophysical surveys). This will also address CDH's concern that anomalies detected during the radiation survey will be sampled along with the pits themselves.

If you have any questions, please contact Jen Pepe of my staff at 966-2184.

Sincerely,

David P. Simonson
Assistant Manager
for Environmental Management
